

# UNIVERSITÀ DI PARMA

PhD Course in Drugs Biomolecules and Health Products

Seminar schedule

**Tuesday, January 23rd 2018**

**14.30 a.m.**

Classroom C - Plesso di Farmacia

**Kelly Bugatti**

“New integrin-targeted small molecule peptidomimetics, their covalent conjugates and nanomaterials for therapeutic and diagnostic applications”

**Omar De Bei**

“Complex between *S. aureus* hemophore and human hemoglobin as target for novel antimicrobial agents against MRSA. From complex Characterization to compounds identification”

**Andrea Ghidini**

“Synthesis of novel NAAA inhibitors”

**Luca Palese**

“New strategies for fast multimodal analgesia for the treatment of moderate-to-severe pain”
