

UNIVERSITÀ DEGLI STUDI DI PARMA

PhD course in Drugs, Biomolecules and Health Products

Seminar schedule

Second /thirdyear Students (XXIX/XXX cycle): illustration of research progress

Wednesday, February 3rd 2016 (9.15, Department of Pharmacy - Parma)

- **Andrea Valeria Canosa** (XXX cycle):

" Optimization of heterologous expression and assay conditions for human proteins of pharmaceutical interest"

- **Laura Contardi** (XXIX cycle):

"Non-viral vectors in gene delivery and characterization of some potential metal enzymes inhibitors"

- **Stefano Maggi** (XXX cycle):

"Metal-responsive DNA compaction and promoter pseudo-knotting by the Ferric Uptake Regulator"

- **Riccardo Piano** (XXIX cycle):

"Chemical modification and characterization of proteins and peptides for pharmaceutical and biomedical applications"

"Targeting protein aggregation for the treatment of degenerative diseases"
